

Salesforce: Post Sales and Other Miscellaneous Tasks

While you may be familiar with day-to-day Salesforce tasks, there are many other functions that can be performed in Salesforce. Some are post sales tasks. Others are just miscellaneous tasks that are executed as needed.

In continuing with the "If it isn't in Salesforce, it didn't happen" motto, these are key tasks that are important to know about in your Salesforce journey.

Goals

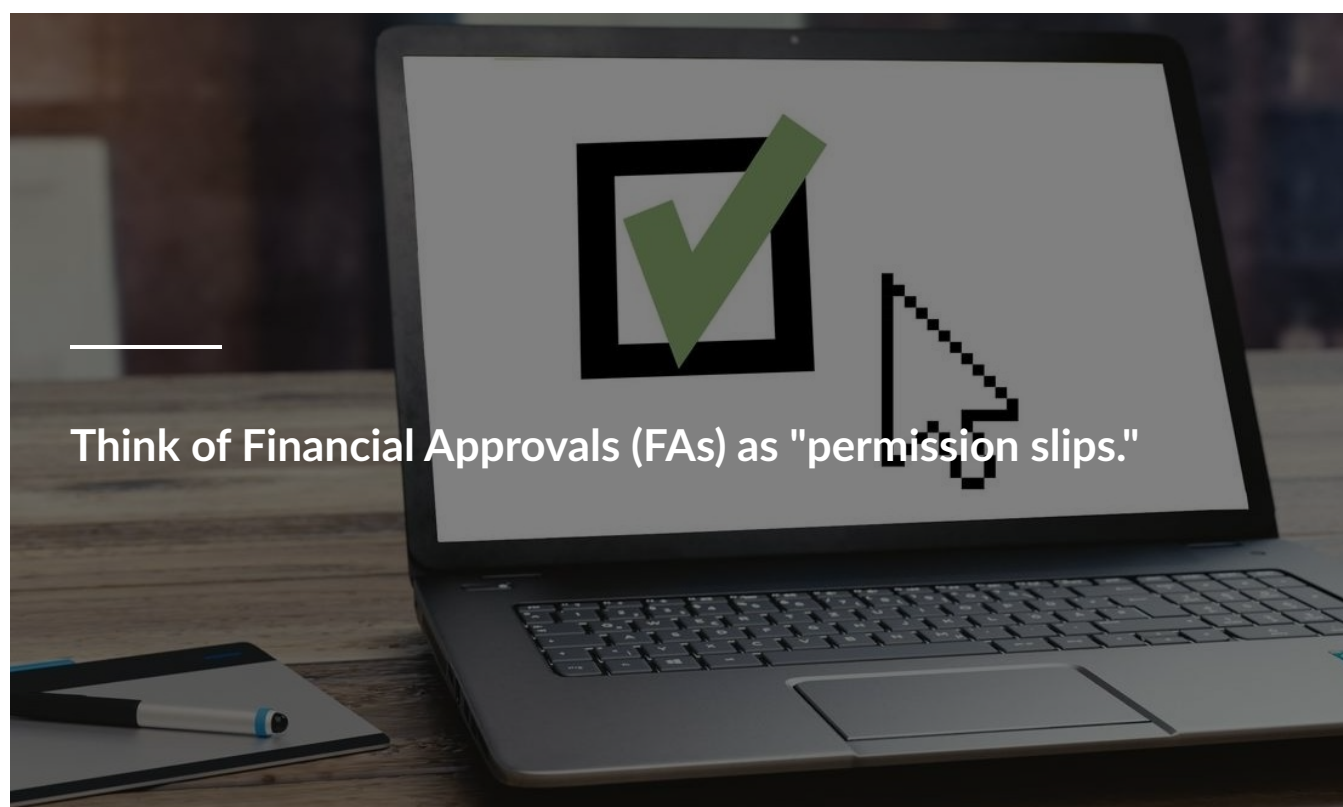

In this course, we will cover these functions in Salesforce:

- Financial Approvals (FAs)
- Cases
- Account Services Assignments
- Basic Reporting

CONTINUE

Financial Approvals

Financial Approvals (fondly known as FAs) are used for processes that require oversight. Here's more details:

- They are submitted to various teams. For example, Finance needs to approve any off rate card pricing . The Advertising Billing Group (ABG) needs to set up account changes.

- When Financial Approvals are created, they start with FA and have a number for reference. Here's an example: [FA-426959](#)
- FAs are created from the account level in Salesforce.
- Submitting FAs is a two step process. First, create and save the FA. Then, submit it for approval.

Key Financial Approval Types

Account Changes FA —

This is used to submit any changes to **active** Salesforce accounts.

Note, an Account Changes FA is only needed to make changes to Salesforce accounts that have been activated -- they have an account number and a status of active. You can make updates to leads and prospects yourself -- an FA is not needed.

Account Changes FAs are also used to take over an account -- assigning your sales desk to an account.

Example:

The active customer's phone number, address, billing role contact, name, etc. changes.

Contract Custom FA —

This is used to gain approval for agreements using off-rate card pricing, such as custom rates, custom margins, etc.

Example:

You are requesting custom rates or custom margins for a long term customer.

Contract Standard FA —

This is used to gain approval for agreements that use rate card pricing, but have discounts.

A contract standard FA is used if the customer is to get discounts (such as spend level discounts) for a long period of time. The FA allows the discount to be programmed into the system so that all ads receive the discount, whether or not they are on the same order. Otherwise, all ads must be on the same order in AdPoint to receive the discount.

Example:

The customer will have an annual spend of \$100,000. You submit a Contract Standard FA so that every ad booked for the year automatically gets the 20% spend level discount.

Digital-DMS Below Minimum Commitment Term/Spend FAs —

These are used to gain approval for any DMS campaigns under the minimum required spend per cycle or under the minimum commitment term. Anything under the minimum spend/commitment as shown on the DMS rate card requires this FA.

Example:

Search Marketing has a minimum 4 month cycle commitment required. The customer has a unique situation that warrants a 3 cycle campaign. You submit an FA to gain approval.

Sales Desk Request FA —

This is used to request a new SD# for a new market.

Example:

You are using an Account Changes FA to take over an account that is in the New York/New Jersey market. You don't currently have an SD# in that market, so you request one before putting through the Account Changes FA.

Auto Renew Opt Out FA

This is used to opt out of Auto Renew for DMS campaigns for reasons beyond variable budget/seasonal campaigns. DMS campaigns are typically auto renewed month to month after the initial campaign period ends. To opt out a customer from this auto renew process, use this FA.

Example:

A DMS customer has a campaign that runs for a year. After that year, the customer does not want their campaign to run month to month. Use the Opt Out FA to stop auto renewing.

A Deeper Dive Into Contract Custom and Standard FAs

Let's look at more about the Custom and Standard FAs that are used for price overrides on orders/ads.

Financial Approval Process For Price Overrides

Let's go through the basic step of using an FA for price overrides.

Step 1

Prior To Meeting with Customer: Create/Submit FA

It is very important to create the FA and submit it for pre-approval **before** going out and pitching the special pricing to the customer. Imagine if it does not get approved--that would be awkward, right?!

How do you create the FAs? No worries--the next two steps provide videos for creating and submitting the Standard and Custom FAs.

Step 2

Creation of Contract Custom FA

This video could not be loaded.

Watch this video above to learn how to create a Contract Custom FA.

Also, here's a reference document as well: [Sales Custom Contract FA Quick Reference Guide.pdf](#)

Step 3

Creation of Contract Standard FA

This video could not be loaded.

Watch this video above to learn how to create a Contract Standard FA.

Step 4

How Long Do I Have to Wait: SLAs

Typical SLAs for the custom/standard FAs are 3 business days.

Step 5

Receive Pre-Approval/Rejection

Once the FA has been submitted, you will either receive pre-approval (yay!) or a rejection (boo!). Be sure to check the email you receive related to the FA status--it will tell you whether it's been approved or rejected.

Step 6

Pitch the Customer

Once you have received approval for the FA, you can pitch the pricing to the customer.
Of course you get the sale!

Step 7

Send Contract/Attach FA

When you send the agreement through our e-contract process, attach the FA.

Want to learn more about our e-contract process? Explore this page in Sales Essentials:

[Contracting Resources](#)

Step 8

Receive Final Approval

The contract and FA will be reviewed and you will receive final approval.

Step 9

AdPoint Synch Process: Attach FA

Attach the FA to the opportunity during the AdPoint synch process.

Want a review of synching? Here's a video: [Oppprtunity Synching](#).

Step 10

SSM Overrides Pricing During Booking

The SSM is then able to override the pricing during booking in AdPoint. The price overridden ads go for approval by the Sales Operations team. With the FA attached, they will get approved. Without the FA, they will get rejected.

Wrap Up

Here's the key points as a take-away:

Get pre-approval for your FA BEFORE pitching the special pricing to the customer.

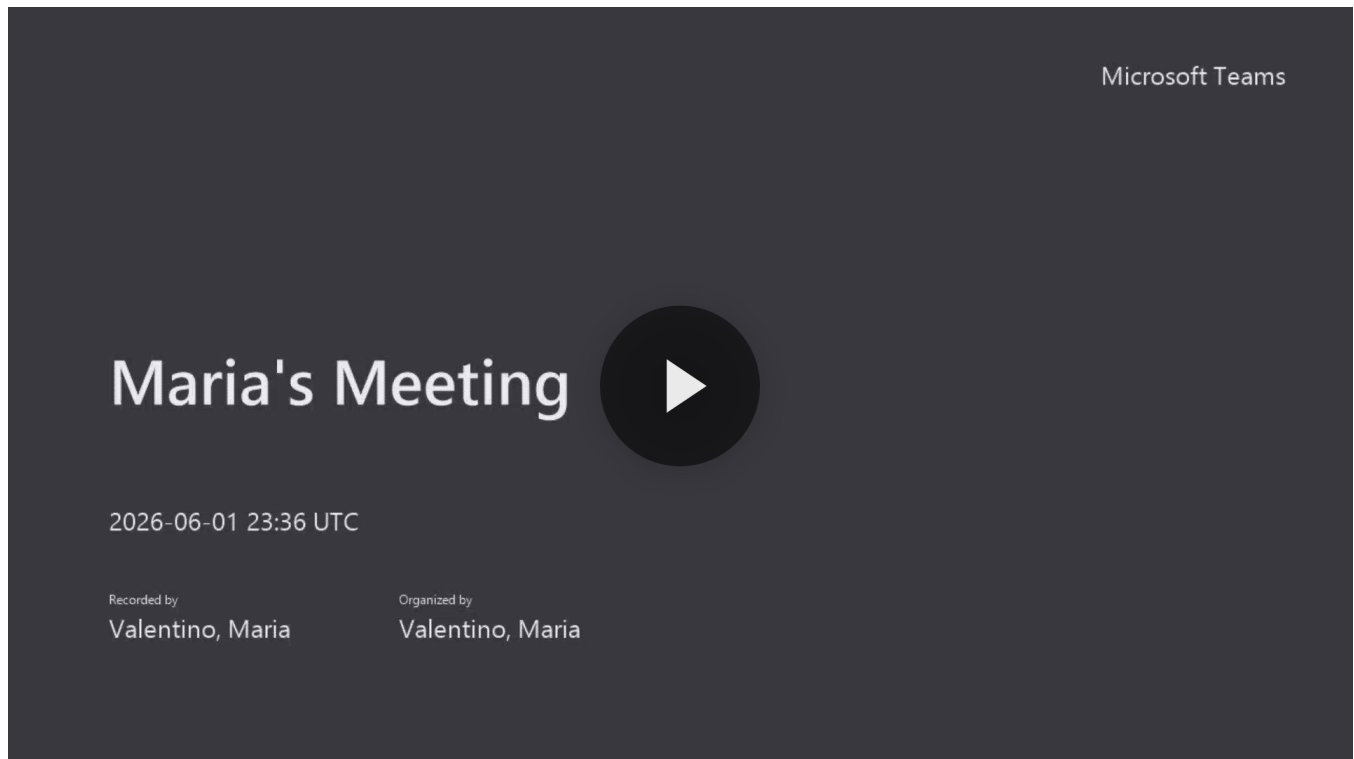

Don't forget to actually click on the Submit for Approval button after saving your FA.

Otherwise, you will be waiting a very long time for approval.

Account Changes FA

Watch this video below to learn how to submit an Account Changes FA.

Also, here's a document that goes through the steps: [Sales Client Changes Quick Reference Guide.docx](#)

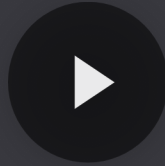

Digital DMS Below Minimum FAs

Watch this video below to learn how to submit the DMS Below Minimum FAs.

Also, here's a general FA document that covers the basic FA process: [Sales General FA Quick Reference Guide.docx](#)

Knowledge Check

Let's test your knowledge of Financial Approvals. Match up the scenarios with the type of FA you would need.

Sales Desk Request FA

You want to take over an account with a market of New York/New Jersey. You currently only have SD#s for Florida and California.

Contract Standard FA

A customer has a unique situation and would like a Social Media Management campaign for under the 6 cycle rate card commitment level.

Contract Custom FA

A customer is going to spend \$60,000 over the course of a year. We want to assure that they get the 15% spend level discount on all orders/ads for the year.

Digital DMS Below Minimum Commitment FA

A long term customer has agreed to a two year contract. You work with your manager to come up with special pricing for them.

Account Changes FA

Your customer calls and tells you that the finance person left and there's a new person who will receive the invoices.

Cases

Change is Inevitable

Some types of Salesforce cases are used for various types of changes to orders/ads or billing. Explore these below.

CAMPAIGN MODIFICATION OR CANCEL CASE

ADJUSTMENT CASE

What? A Campaign Modification or Cancel case is used to make changes or cancel orders/ads either prior to them running or when they are in the midst of running.

Example: An ad is running from 1/1/26 through 1/1/27. In June 2026, the customer wants to increase the number of impressions because the campaign is doing so well.

Or, an ad is booked to start on 9/1/26. In Aug 2026, the customer decides to cancel the campaign before it begins running.

Who? These types of cases go to the Sales Support Managers (SSMs), who make the changes in AdPoint.

How? Learn how to create these cases by watching the video below.

This video could not be loaded.

CAMPAIGN MODIFICATION OR CANCEL CASE

ADJUSTMENT CASE

What? An adjustment case is used to make changes to billing after the fact. In this situation, the ad has already run, so it cannot be corrected. Instead, the invoice needs to be adjusted.

The way to remember the difference from Campaign Modification/Cancel Cases is that Adjustment = After the fact.

Example: A print ad ran with the incorrect color. The ad has already run incorrectly in the newspaper, so the invoice needs to be credited instead.

Who? These types of cases go to the Client Advocacy or "CAT" team. They review and make recommendations for adjusting billing.

How? Learn how to create these cases by watching the video below.

This video could not be loaded.

Account Services Assignments

Account Services Teams

On Salesforce accounts, you can see the account services teams who aid you in post sales tasks. Here's the two key roles:

- **Sales Support Manager/SSM:** They are also fondly known as Order Entry or OE. They enter the sold orders/ads into AdPoint, our booking/billing system. They also handle creative tasks.
- **Account Managers:** They are the main point of contract for the customer relationship post-sale. They work with the Optimizers on fulfillment.

Account Services

	Account Services Name	User	Role	Created Date	Hierarchy Sort	AccountID Plus Role
1	ASA-14858553	Elaine Poleni	Account Manager	4/1/2025 12:05 AM	1	Account Manager 001E000000EBgL1
2	ASA-15348890	Melissa Wiseman	Sales Support Manager	4/2/2025 6:47 AM	61	Sales Support Manager 001E000000EBgL1
3	ASA-17127287	Evan Kovach	Optimizer 1	7/11/2025 5:25 PM	25	Optimizer 1 001E000000EBgL1
4	ASA-19250888	Chuck Borinstein	Optimizer 2	3/12/2026 11:57 AM	26	Optimizer 2 001E000000EBgL1

Steps to View Account Services Teams

1. Go to the account in Salesforce.
2. Click on or hover over the blue **Account Services** link in the middle of the screen.
3. The Sales Support manager and Account Manager for the account is shown.

Note, click on the image to the left to enlarge it to see details.

Basic Reporting

Let's See All Those Sales!

Salesforce Reporting

There are many existing reports in Salesforce that you can utilize to see your opportunities, revenue, activities, etc. Also, custom reports can be created as well.

Let's explore some key basic reports in the tabs below. In the tabs, there are definitions and direct links to the reports. Use the arrows to navigate between the tabs.

Before working in this section, sign into Salesforce. Then, click on each of the links to open the report and view it in Salesforce with your own data.

Here's a summary document of the reports as well: [Key Salesforce Reports](#)

MY ACCOUNTS BY SALES DESK	MY ACCOUNTS AND CONTACTS	MY LAPSED ACCOUNTS	MY PIPELINE	RE PRO
Definition: This shows your account list by Name, Sales Desk, SD#s and Account type. It also shows Last Activity, Last Ad Date, Market, AdPoint ID, Last Year (LY) and This Year (TY) Spending. Link: My Accounts by Sales Desk				

MY ACCOUNTS BY SALES DESK	MY ACCOUNTS AND CONTACTS	MY LAPSED ACCOUNTS	MY PIPELINE	RE PRO
Definition: This shows your accounts with their contact information. Details shown for contacts include Contract Name, Role, Email, Phone Number and several other fields. Remember, you need to always have a billing role contact on your accounts. This report is a great way to verify this. Link: My Accounts and Contacts

How Do I Get More Help?

I Get By With a Little Help from My Friends

Support

We know you won't be able to remember every last thing from this training session. That's ok--we just want you to get familiar with the concepts.

If you need help, you've got a lot of folks available to help you.

- **Salesforce Champions:** They provide Salesforce specific help. They can help with Level 2 type items on Salesforce, such as errors, issues, more complex processes, etc. They are reached by logging a case in Salesforce. Here's a video to see how to do that: [Salesforce Support Case](#)
- **Sales Operations:** They can also provide Salesforce help. In addition, they can provide help on other sales processes, product information, etc. If you aren't sure where to go for help, go to Sales Ops!
