Overview

This process allows you to extract certain areas of a document for review or for use in other documents.

Before You Begin

Be sure that the document is saved to your *Documents/My Documents* folder.

Procedure

Step 1: Access document

Click on the document in the *Documents/My Documents* folder.

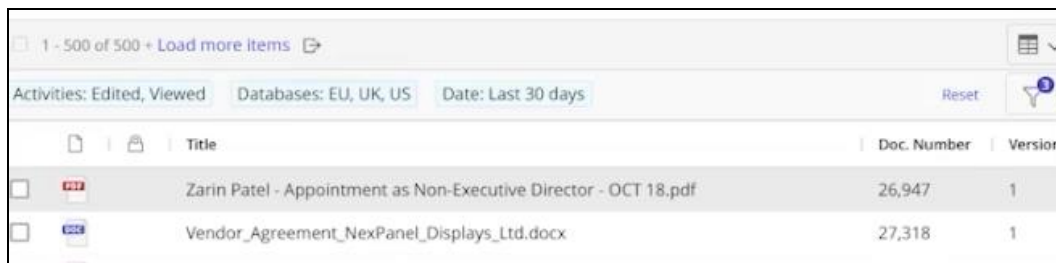

Figure 1: Select document

Step 2: Select extract

Select *Extract* from the dropdown menu.

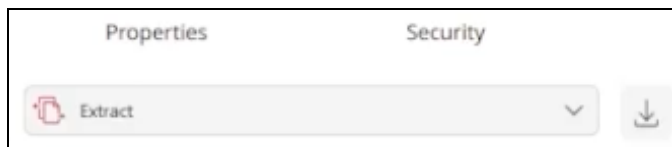

Figure 2: Extract option

Step 3: Indicate what text to extract

In the *Text* box, tell the system exactly what you would like to extract from the selected document. Click on the *arrow*.

Talk to the system naturally like you are asking an eager intern to perform a task. The extract panel also provides suggestions based on the document content.

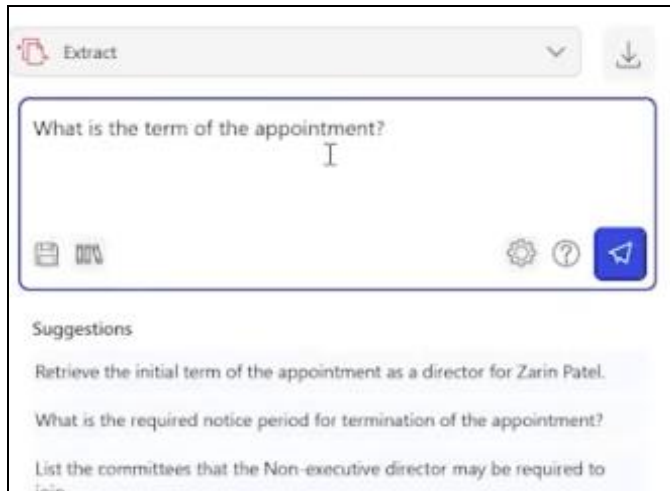

Figure 3: Type what to extract

Step 4: Review extract

The extract is displayed for review in the **Answers** pane.

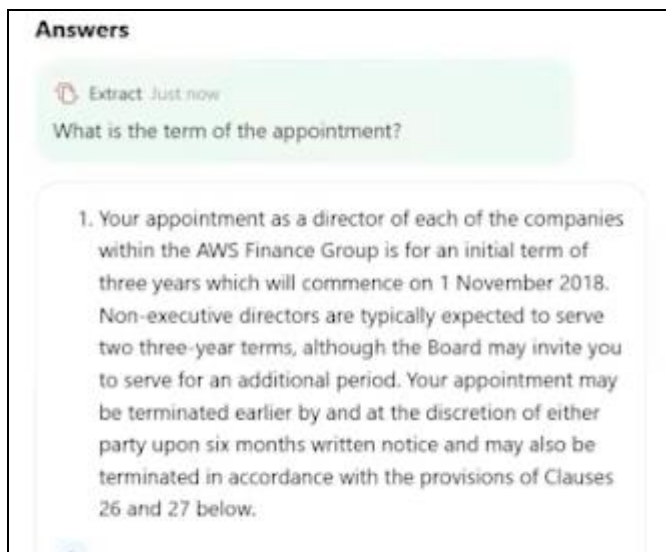

Figure 4: Answers pane

TIP

The extracted text can be copied into other documents by using *ctrl +C* or the *Copy to Clipboard* command on the **Answers** pane.

Step 5: Document reference

The extract tool indicates via a yellow highlight exactly where the extracted text came from in the original document.

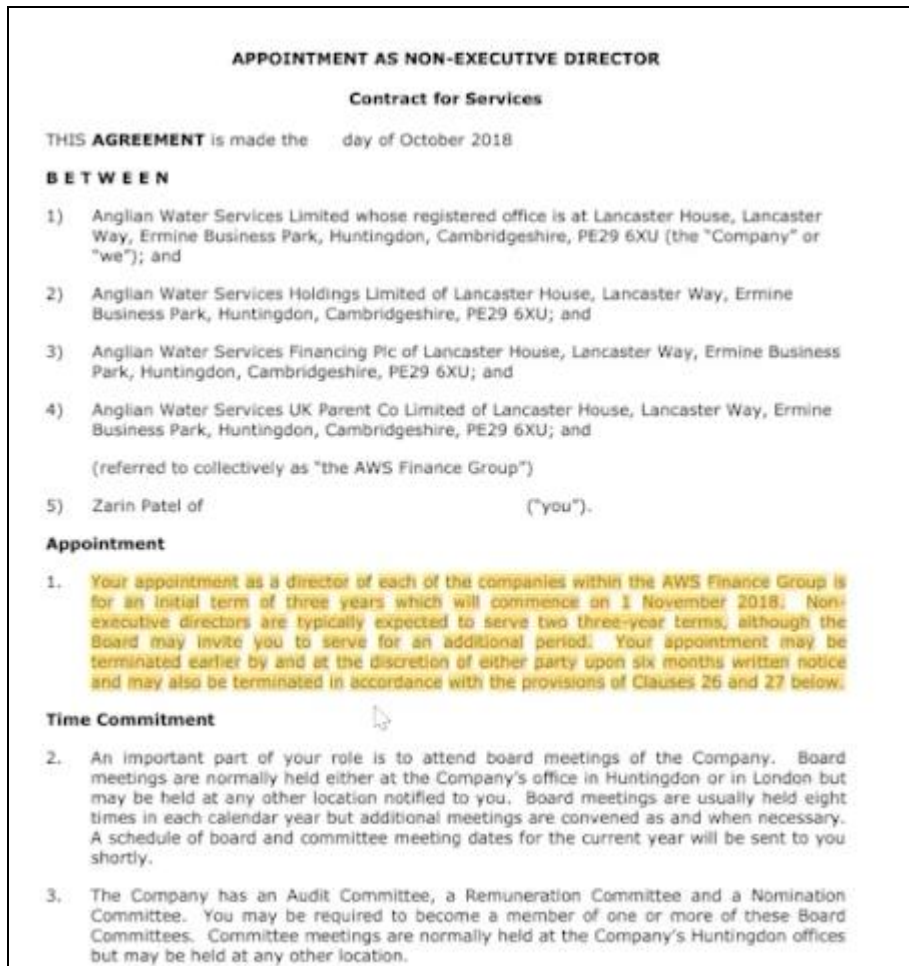

Figure 5: Document reference

Common Issues

Copy to Clipboard is not available.

Hover over the lower right-hand corner of the **Answers** pane. Look for a small document icon to display.
